

Rayhan Noufal Arayilakath

rayhnouf@gmail.com / Keller, TX

Summary

Passionate and efficient web developer and software engineer with a strong portfolio of completed projects and satisfied clients. Known for delivering user-centered solutions and optimizing experiences. Currently excelling as an anti-abuse engineer at Replit while continuously expanding my skill set and tackling new challenges.

Work Experience

Community Moderation Intern

Replit

03/2023 - Present

- Leading a team of volunteer community moderators - helping to facilitate communications, events, and relations.
- Developing advanced security infrastructure to combat site abuse, phishing, credit card fraud, and copyright violations.
- Deployed a data-driven workflow to fine-tune an AI model on previous reports to handle spam posts.
- Managing internal calendars, meetings, and task management systems.
- Overseeing various public forums, including on-platform, Discourse, and Discord.
- Assisting in the evolution of internal and public Trust and safety policy.

Web Developer

Freelance

09/2022 - 01/2023

- Developed various web applications, including AI generative art platforms, internal search tools, and project management dashboards.
- Created products in a variety of languages, such as Node.js, Python, Golang, and Lua.
- Designed user interfaces and brand identities from scratch.
- Optimized user experiences to fine-tune the adoption of new applications.
- Worked with over eight clients in six months, multitasking various projects and balancing meeting schedules.
- Satisfied all clients I worked with, some even requesting future work opportunities.
